

Gwent Well-being Survey

Public services in Gwent are improving how they work together through the newly formed Public Services Board.

We want to talk to as many people as possible, who live and work in Gwent, about wellbeing. We want to know what is good about your community and what you want the future of your community to be.

Over the late summer/early autumn of 2021 we will be gathering your views. We want the community to help shape the way public services plan and work together. We have plenty of statistics and data but hearing what people have to say is important to make sense of what this information is telling us.

We all want good value for money from our public services and this is best done when we work together. We will use the information you tell us to help us assess the well-being of Gwent. This assessment will then help the public services board to develop a well-being plan for Gwent - the things that are best done when working together and with you.

Improving well-being is a long term aim of Welsh Government and all public bodies in Wales. It will require us to respond to challenges such as poverty, an aging population, health inequality and climate change. Future generations of young, adult and older people will face a different world to the one we have now - so this assessment and plan will look at how we need to do things differently to make things better in the future.

As part of the Gwent Well-being Survey we will be collecting and processing some data about you. The information we obtain will be shared with the organisations who are leading on the Gwent Well-being Survey project. All information provided will be held in accordance with the GDPR privacy statement which can be found at <https://www.blaenau-gwent.gov.uk/en/corporate/privacy-policy/gwent-well-being-survey-privacy-notice/>.
